

ENVIRONMENT POLICY

We aspire to Zero Harm and our current and on-going objective is to prevent pollution and reduce the adverse impact on the environment as a result of our business activities.

At Silver City Drilling, we believe the term "Environment" encompasses not only the physical environment in which we work, but includes people, their work and the things they value. Management is accountable for the Environmental performance of Silver City Drilling and the implementation of this Policy.

To deliver on our commitment we will:

- Incorporate environmental management systems as part of our critical business activities;
- Encourage new ideas or ways of minimising our environmental impacts;
- Strengthen our partnerships with stakeholders to achieve our objectives and obligations;
- Strive to effectively manage resources, reduce waste and eliminate or minimise adverse environmental effects and risks that may be associated with our operations;
- Meet and, where appropriate, exceed applicable environmental laws, statutory obligations and relevant voluntary codes of practice;
- Monitor and set measurable targets to seek continual improvements to our environmental performance; and
- Periodically review and maintain our Environmental Policy and Procedures

A handwritten signature in black ink, appearing to read "V. Oldfield", is written over a light grey horizontal line.
